Notice of Unauthorized Access to File Server

Osaka, Japan - Panasonic Corporation has confirmed that its network was illegally accessed by a third party on November 11, 2021. As the result of an internal investigation, it was determined that some data on a file server had been accessed during the intrusion.

After detecting the unauthorized access, the company immediately reported the incident to the relevant authorities and implemented security countermeasures, including steps to prevent external access to the network.

In addition to conducting its own investigation, Panasonic is currently working with a specialist third-party organization to investigate the leak and determine if the breach involved customers' personal information and/or sensitive information related to social infrastructure.

Panasonic would like to express its sincerest apologies for any concern or inconvenience resulting from this incident.
