Panasonic Holdings Corporation

Panasonic GREEN IMPACT

In a Survey Conducted by CDP*1 on Climate Change-Related Measures and Transparency, Panasonic Receives Highest “A”² Rating

Osaka, Japan – In a corporate sustainability survey conducted by CDP with a focus on climate change, Panasonic Holdings Corporation (hereafter PHD) was included in the Climate Change A List companies for 2022, being recognized by the international NGO for its leadership in climate change-related transparency and performance.

Disclosing environmental information through CDP is widely regarded as a global standard for corporate environmental reporting, and a record-high number of about 18,700 companies across the world participated in CDP's 2022 survey. PHD was highly rated in terms of governance for the solution of climate change-related issues, activities to reduce CO₂ emissions, and the transparency of its emissions disclosure from its own value chain. As a result, it became one of the 74 Japanese companies that received the highest rating of “A” in the category of climate change from CDP.

The Panasonic Group has been upholding its long-term environmental vision, Panasonic GREEN IMPACT (hereafter PGI), which aims to achieve the coexistence of both “a better life” and “a sustainable global environment.” Accordingly, in its business activities, the Group has been working to reduce CO₂ emissions in its business operations to net zero by 2030 and to create a Contribution Impact toward 2050, specifically to contribute to reducing CO₂ emissions by 300 million tons^{*3}, which is equivalent to about 1% of total current global emissions^{*4}.

Going forward, the Panasonic Group will work toward carbon neutrality hand in hand with society to solve urgent climate change issues while promoting highly transparent environmental information disclosure.

*1: CDP is an international NGO headquartered in the United Kingdom. It conducts activities to urge companies and local governments to disclose information about their environmental measures. A total of more than 680 institutional investors responsible for assets of more than 130 trillion US dollars as well as 280 major purchaser companies

with a total procurement spend of 6.4 trillion US dollars ask their business partners and others to disclose data about their environmental impact, risks, and opportunities through CDP's platform.

*2: CDP rates companies using nine grades (A, A-, B, B-, C, C-, D, D-, and F).

*3: Calculated based on CO₂ emission factors for 2020.

*4: Energy-related CO₂ emissions totaled 33.6 billion tons in 2019. (Source: IEA)
